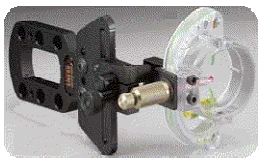
Step Outdoors



Archery Accesories

OBJECTIVE

To provide participants with a selection of accessories that bow hunters may use while hunting.

MATERIALS REQUIRED

Archery Catalogues, bow quivers, sights, stabilizers, bow slings, packs, calls, scents etc.

DISCUSSION

There are limitless accessories used by hunters and bow hunters. This exercise is designed to help participants select which items they think are worth taking along on a hunting outing.

ACTIVITY

Using a standard bow, have the participants outfit it with the accessories they think are suitable for the type of outing they are planning. What type of quiver do they want attached to the bow or back quiver? What style and length of Stabilizer would they use? Arrow rests are varied and some are more suitable for target applications. What makes a good Hunting Sight?

Using samples and catalogues make a list or photo collage of the many accessories used by bow hunters. Have the participants explain their reasons for their choices. Has it made their hunt more successful? Why are some accessories more necessary than others? When does too much become too much?

EXTENSION

What are the legal ramifications of having lights and electronic equipment while bow hunting? Are there ethical choices to be made?

Time: .75 **hour**
Intro: 10 min
Activity: 30 min
Discussion and Review: 5 min

Safety
No safety concerns
